

Risk Rating Table for Risk Assessments

The following Risk Rating table is used to assess the likelihood of an accident or incident occurring.

Likelihood	Consequence	Risk Rating	Risk Control
High	High	1	Take immediate action – high likelihood of serious injury occurring
High	Medium	2	Take immediate action – high likelihood of serious injury occurring
Medium	High	3	Take action to reduce the likelihood of accident / incidents occurring
Medium	Medium	4	Plan to reduce the likelihood of the accident / incident occurring
Low	High	5	Monitor standards and procedures regularly to maintain the likelihood of the accident / incident occurring to the lowest possible level.
Low	Medium	6	As above
High	Low	7	Seek means of reducing likelihood
Medium	Low	8	As above
Low	Low	9	Monitor to ensure that likelihood does not increase.
